q34_21. WHY DON'T THEY COME BACK?

GreenPeak Fitness runs twelve gyms in Ho Chi Minh City. New members join every month thanks to heavy advertising, but six out of ten leave within three months. Exit surveys show the same complaints: staff do not remember members' names, trainers change frequently, and members feel 'like a number'. Many also say they received no contact from the gym after joining. The marketing director wants to offer a 30% discount to anyone who renews. The operations manager disagrees. She believes the gym should build real relationships: personal welcome sessions, regular progress checks with the same trainer, member events and a simple app that reminds people of classes. The CEO must decide where to invest a limited budget.

QUESTION: What is GreenPeak Fitness's main problem?

a. It cannot attract any new members.
b. It has no gyms in Ho Chi Minh City.
c. Many members leave soon after joining.
d. Its advertising has stopped completely.
